PRODIGY PERFORMANCE CONCEPT

UNIHOC SEASON 2025

PRODIGY PERFORMANCE CONCEPT is our line-up for the youngest players out there, featuring a wide range of lengths and blade options suitable for the stars of the future. This year we introduce the new color of the year in the concept, called **radiant red**.

PERFORMANCE

The **PERFORMANCE SERIES** is our new concept in the composite shaft segment. The sticks are produced with a combination of high quality glass fiber and carbon fiber; developed for players who demand solid, durable sticks that offer both great touch and lasting quality at a good price level. The series features a mix of our most popular blade models and are available for both for junior and senior players.

CARBSKIN CLASSIC RED EDITION

The **CARBSKIN**[®] concept is perhaps our most well-known and popular stick category in the high-end segment of super lightweight sticks. It is pushing the benchmark of lightweight sticks to a totally new level in terms of required shaft properties. Utilizing a cutting-edge layup structure for the construction of these shafts, and combining it with a thinner material, we have managed to improve the strength and durability to unmatched levels in the lightweight segment. This year we introduce the **CARBSKIN**[®] **CLASSIC** sticks in a brand new radiant red color tone, and it is available with both **round** and **oval** shaft shape.

SLIM

Last season the **CARBSKIN**[®] range received a new addition, called **CARBSKIN**[®] **SLIM**. The shaft has a thinner grip profile with a diameter of only 23.8 mm, and the result was a massively increasing demand for this lightweight shaft model. This year's design has received a tune-up and is now sparkling with a holographic silver pattern on a turquoise carbon fiber background, creating one of the most exclusive and eye-catching looks in the entire collection.

TOP LEVEL FLOORBALL DEVELOPMENT

Pushing the limits has always been important for UNIHOC and this is something that is in our DNA. Over the years this has led to several boundary breaking inventions, such as the Curve shaft and the development of the layered goalie equipment.

With the **EVOLAB** concept we have taken our focus on development further than ever before, trying to push the boundaries as far as physically possible. This is a process in which we gather all our internal knowledge and combine it with the input from the best floorball players in the world, pushing the limits of what is achievable as far as we can.

In the development and release of a new **EVOLAB** product each step is properly tested and evaluated to see what is good and what is flawed, and then the process is adapted and improved accordingly to find the optimal result for each component that will be used in the final version of the product. The work continues until the result is perfected and all the parts of the new product match our demands to 100%.

CURVE SERIES

This year we have placed both our **CURVE** models in the new **CURVE SERIES**. The CURVE shaft is designed to increase the shot power of the player and its unique shaft construction with a slightly curved lower part creates an increased angle between the blade and the floor, adding extra power in the shot release.

INTRODUCING EVOLITE

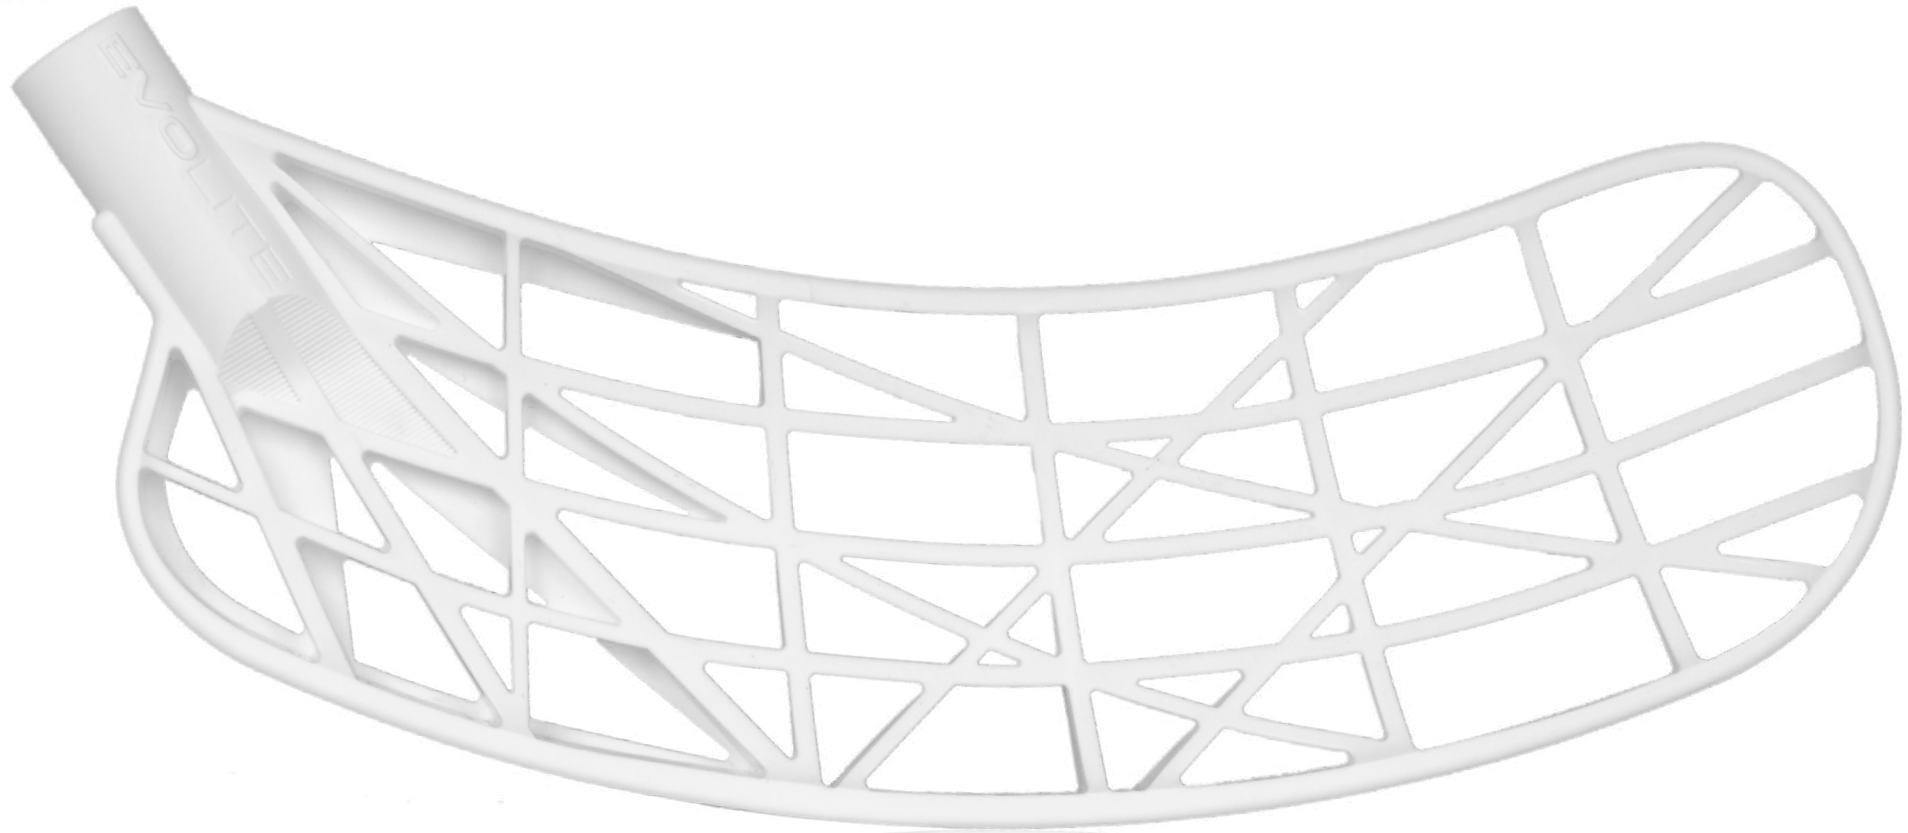

This season we are dropping our new **EVOLITE** blade, following in the footsteps of the successful **UNILITE** blade. The new blade has a reinforced construction for added strength and it has also been slightly increased in size, and we have made sure to give it the same sensational touch and playability as its predecessor.

UNI LITE

UNILITE is our lightest blade ever. The construction is designed to cut unnecessary weight but still keep the torsional strength of the blade as well as the great playing characteristics. The result is a brand-new shape and bar system with medium pre-hook and concavity, combined with a clearly marked step between the frame and the playing surface for great ball control and shot release.

ICONIC

ICONIC is a shooting blade from Unihoc. This is the most aggressive blade in our collection, totally focused on optimizing the shooting qualities of the players. The blade has a distinctive concavity along the entire playing surface, starting immediately at the heel of the blade and running all the way to the tip. This concavity improves the ball handling by giving a great grip on the ball, and at the same time it adds extra power in the shot release.

The **FEATHER PP** is a lightweight blade with soft touch and high friction, available in medium.

TITAN PP is a super firm blade material with low friction against the floor surface.

GRIPBANDS

The grip is the final link between the hands and the stick and it is very important to make the right choice about which grip that is the best one for each individual player. The range is wide and you have to decide whether to go for tackiness, durability, low weight, thickness or color.

SUBLIMATION

Now you can customize your own unique design for the **PHOENIX ECO** set by using **SUBLIMATION TECHNOLOGY**. This means that you can create your team's match set exactly as you want it in terms of colours, logos, player names and numbers. The design is sublimated into the fabric, which gives a soft garment without any printed transfers on it.

FLOORBALL RINK PREMIUM

The **PREMIUM RINK** sets a new standard for floorball rinks in terms of sustainability, materials and design. We have gathered a lot of information from our teams and federations to create the best floorball rink out there. The demands are always increasing along with the growth of the sport, and that is why we are very proud to present this high end rink to the market. The rink has 6 mm thick walls made of polypropylene (PP) plastic material. The PREMIUM rink model comes with substitution zones clearly marked in white top rail colour.

RINK PREMIUM SPLIT SYSTEM

The **SPLIT SYSTEM™** is developed as a complement to the PREMIUM and BASIC rinks, to make it possible to divide the gymnasium into several smaller playing fields. The **SPLIT SYSTEM™** consists of 4 pcs of corner parts, 14 pcs of 2.5m parts and 2 pcs of 1.5m parts (40x20m rink). A full-size playing field can thus be divided into 3 smaller fields as illustrated above. **57980**

FLOORBALL RINK BASIC

The **BASIC** sets a new standard for floorball rinks in terms of sustainability, materials and functionality. This BASIC rink model has slightly thinner walls than the PREMIUM model, which gives it not only a reduced weight but also a lower price. This rink model comes in solid black colour with no deviating contrast colour for the substitution zone top rails.

UX GOALIE

The Unihoc goalie shoes are very popular and ever since we introduced them in our collection they have been one of our bestsellers each year.

UX GOALIE is a modern goalie shoe that has been developed with mobility and comfort in mind. The new shoe has been developed as a combination of very strong and durable materials to create the perfect lightweight shoe for the modern goalkeeper.

The shoe is loaded with several special features such as the Slide Control Area, the Flexi Shank and the Lace Cover System. The dual outsole system makes the shoe very versatile and with a brand new design that will match any goalie set the new **UX GOALIE** model is sure to be a corner stone in our shoe collection.

STABILITY

LIGHTWEIGHT

CUSHIONING

The **U3 JUNIOR** indoor shoe is the perfect model for the youngest players. This is a classic shoe model developed with strength and stability in focus. Strong micro fiber mesh has been used for the upper construction to give breathability and low weight, and in combination with a robust layer of PU the shoe is certain to offer both durability and comfort to match the high demands of the floorball game. The added U-frame along both sides ensures a strong construction and stability. The rubber outsole is made of non-marking rubber with excellent grip on the playing field.

U4 PLUS

The **U4 PLUS** is a light performance shoe especially designed for floorball. The upper construction is made of breathable mesh for added comfort and cooling, and in combination with the printed hotmelt areas it gives a very modern floorball shoe with an optimized fit. This technically crafted shoe offers all the benefits that a floorball shoe needs, such as low weight, excellent medial and lateral support, as well as great durability.
