WORKBOOK

SEASON 23/24

PRODIGY PERFORMANCE

the youngest players out there, featuring a wide range of lengths and blade options suitable for the stars of the future.

The weight relates to the length marked with *

SUPERSKIN

The SUPERSKIN stick series features our SOLID BALANCE TECHNOLOGY, which is a concept where each player has the possibility to pick the preferred shaft from several different weight and price categories within the same stick series, and also match it with his or her blade of choice. This year we have made the concept even wider than before as we have added oval shaft options in several of the categories. Each shaft category is designed in its own color theme to make it as easy as possible to find the stick type that you are looking for.

All you have to do is decide which shaft model and what flex you prefer:

5% CARBON FIBER 95% GLASS FIBER

40% CARBON FIBER **60%** GLASS FIBER

80% CARBON FIBER **20%** GLASS FIBER

95% CARBON FIBER **5**% GLASS FIBER

95% CARBON FIBER

100% CARBON FIBER

This concept features the SOLID BALANCE TECHNOLOGY shaft system which aims to offer a wide range of options from which you can choose your own perfectly balanced stick in all weight categories without sacrificing stability, strength, and quality.

REG

PRO

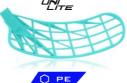

SUPERSKIN COMP

This is the junior option in the **SUPERSKIN** range. A strong shaft with great balance and low weight. 5% carbon fiber, 95% glass fiber.

SUPERSKIN MID

The **SUPERSKIN MID** shaft is a great option for both junior and senior players thanks to its versatility. 40% carbon fiber, 60% glass fiber. Now available also with **OVAL KIT** grip profile.

EVOLAB is our concept for developing and implementing cutting edge floorball equipment, where we push the limits further than ever before.

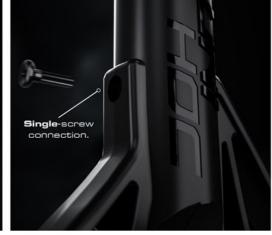

TOP LEVEL FLOORBALL DEVELOPMENT

Pushing the limits has always been important for UNIHOC and this is something that is in our DNA. Over the years this has led to several boundary breaking inventions, such as the Curve shaft and the development of the layered goalie equipment.

With the EVOLAB concept we have taken our focus on development further than ever before, trying to push the boundaries as far as physically possible. This is a process in which we gather all our internal knowledge and combine it with the input from the best floorball players in the world, pushing the limits of what is achievable as far as we can.

In the development and release of a new EVOLAB product each step is properly tested and evaluated to see what is good and what is flawed, and then the process is adapted and improved accordingly to find the optimal result for each component that will be used in the final version of the product. The work continues until the result is perfected and all the parts of the new product match our demands to 100%.

TOP LEVEL FLOORBALL DEVELOPMENT

OUR **LIGHTEST** BLADE EVER

UNILITE is our lightest blade ever. The construction is designed to cut unnecessary weight but still keep the torsional strength of the blade as well as the great playing characteristics.

The result is a brand-new shape and bar system with medium pre-hook and concavity, combined with a clearly marked step between the frame and the playing surface for great ball control and shot release.

PRE HOOK 13 MM/15 MM/13 MM

PE

The **REGULAR PE**blade is our most
common blade type,
available in soft,

ICONIC is a shooting blade from Unihoc. This is the most aggressive blade in our collection, totally focused on optimizing the shooting qualities of the players. The blade has a distinctive concavity along the entire playing surface, starting immediately at the heel of the blade and running all the way to the tip. This concavity improves the ball handling by giving a great grip on the ball, and at the same time it adds extra power in the shot release.

GRIPBANDS

The grip is the final link between the hands and the stick and it is very important to make the right choice about which grip that is the best one for each individual player. The range is wide and you have to decide whether to go for tackiness, durability, low weight, thickness or color.

FOOTWEAR

The **U6 COURT** shoe model is the perfect floorball model with great stability and low weight in combination with great cushioning. The new upper has been designed to offer a fantastic fit when you slide the shoe onto your foot and to give a great stability and cushioning. Both the medial and lateral sides of the upper are using modern lightweight materials that offer strength as well as comfort along the entire foot.

FOOTWEAR

The **U4 PLUS** is a light performance shoe especially designed for floorball. The upper construction is made of breathable mesh for added comfort and cooling, and in combination with the printed hotmelt areas it gives a very modern floorball shoe with an optimized fit. This technically crafted shoe offers all the benefits that a floorball shoe needs, such as low weight, excellent medial and lateral support, as well as great durability.

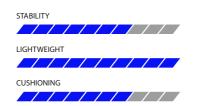

FOOTWEAR

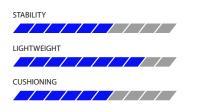

The Unihoc goalie shoes are very popular and ever since we introduced them in our collection they have been one of our bestsellers each year. **UX GDALIE** is a modern goalie shoe that has been developed with mobility and comfort in mind. The new shoe has been developed as a combination of very strong and durable materials to create the perfect lightweight shoe for the modern goalkeeper.

The shoe is loaded with several special features such as the Slide Control Area, the Flexi Shank and the Lace Cover System. The dual outsole system makes the shoe very versatile and with a brand new design that will match any goalie set the new **UX GOALIE** model is sure to be a corner stone in our shoe collection.

FOOTWEAR

The **U3 JUNIOR** indoor shoe is the perfect model for the youngest players. This is a classic shoe model developed with strength and stability in focus. Strong micro fiber mesh has been used for the upper construction to give breathability and low weight, and in combination with a robust layer of PU the shoe is certain to offer both durability and comfort to match the high demands of the floorball game. The added U-frame along both sides ensures a strong construction and stability. The rubber outsole is made of non-marking rubber with excellent grip on the playing field.

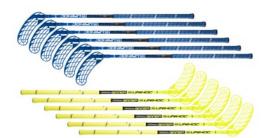

BASIC COLLECTION

The **UNIHOC BASIC COLLECTION** is created to help spreading this fantastic sport across the globe. The floorball sport is getting more and more recognized and widespread each year and to be able to supply the new floorball markets with a suitable type of equipment to get the game going we have developed a range of products that is perfect for this purpose.

FLOORBALL RINKPREMIUM

The **PREMIUM RINK** sets a new standard for floorball rinks in terms of sustainability, materials and design. We have gathered a lot of information from our teams and federations to create the best floorball rink out there. The demands are always increasing along with the growth of the sport, and that is why we are very proud to present this high end rink to the market. The rink has 6 mm thick walls made of polypropylene (PP) plastic material. The PREMIUM rink model comes with substitution zones clearly marked in white top rail colour.

57950 RINK PREMIUM BLACK COMPLETE 40X20M 57951 **RINK PREMIUM BLACK**

COMPLETE 24X14M

RINK CAN BE CUSTOMIZED **ACCORDING TO REQUIRED** MEASUREMENTS.

RINK PREMIUM SPLIT SYSTEM

The SPLIT SYSTEM $^{\text{TM}}$ is developed as a complement to the PREMIUM and BASIC rinks, to make it possible to divide the gymnasium into several smaller playing fields.

The SPLIT SYSTEM™ consists of 4 pcs of corner parts, 14 pcs of 2.5m parts and 2 pcs of 1.5m parts (40x20m rink). A full-size playing field can thus be divided into 3 smaller fields as illustrated above. **57980**

RINKBASIC

The BASIC sets a new standard for floorball rinks in terms of sustainability, materials and functionality. This BASIC rink model has slightly thinner walls than the PREMIUM model, which gives it not only a reduced weight but also a lower price. This rink model comes in solid black colour with no deviating contrast colour for the substitution zone top rails.
